

# PVC Interlocking Panels

## A Sanitary Cladding System

### OVERVIEW

There is an urgent need to provide temporary hospitals and facilities to COVID-19 patients and temporary shelters to displaced individuals. Currently, hospitals and temporary shelter applications are utilizing curtains to separate patients, individuals and animals.

Our PVC Interlocking Panels feature a multi-wall structure that results in a high degree of rigidity and strength, while allowing for rapid and cost effective installation.

The panels advanced resistance to chemicals allow for frequent cleaning and sanitary maintenance, as well as extended service in harsh chemical environments. We believe that utilizing our PVC wall panels during the COVID-19 crisis will provide a safer, cleaner, and sturdier barrier between individuals.

### MAIN BENEFITS

- ◆ Efficient Distancing Barrier
- ◆ Rapid tongue & groove installation
- ◆ Excellent chemical resistance
- ◆ Easy-to-clean & sanitize
- ◆ Waterproof, rust-proof
- ◆ Portable
- ◆ Assemble/disassemble with two people
- ◆ Non-flammable - Class A Fire Rating
- ◆ Option to utilize recycled PVC

### TYPICAL APPLICATIONS

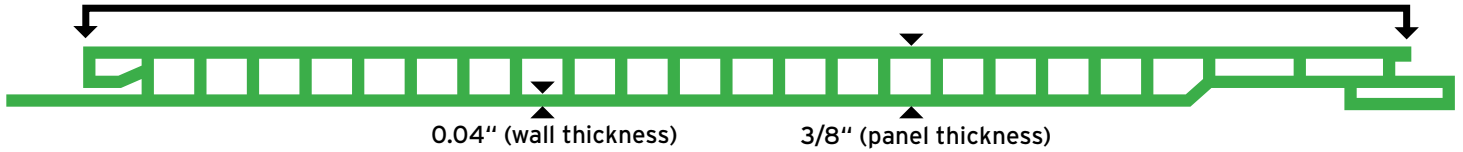

- |                            |  |
