

CHEMPROCID[®]

Hard Surface Disinfectant & Sanitizer

Description

CHEMPROCID[®] is a one-step neutral disinfectant that is effective against a broad spectrum of bacteria and microbes, with active ingredient Didecyl Dimethyl Ammonium Chloride (a.k.a. "DDAC"). DDAC is a well-established disinfectant that is used in many biocidal applications. It also contains 10% by volume isopropyl alcohol, a well-known solvent but which is also widely evidenced, researched and documented for decontamination effectiveness. **CHEMPROCID[®]** is used For Sanitizing, Disinfecting and Deodorizing.

Application

CHEMPROCID[®] is recommended for use in hospitals, medical and dental offices, nursing homes, public rest rooms, institutions, schools, colleges, food processing plants, food storage areas, kitchens, restaurants and bars, airports, transportation terminals, hotels and motels.

Use **CHEMPROCID[®]** on finished floors, high speed burnished floors, conductive flooring, washable walls, tables, chairs, bathroom bowls, sinks, basins, shower stalls, tubs, glazed tiles, toilet, countertops, stove tops, exteriors surfaces of appliances and refrigerators, cabinets, garbage cans, tables, outdoor furniture, chairs, desks, telephones, door knobs and handles, and glass surfaces including windows and mirrors.

Spray a solution of **8 ml/L CHEMPROCID[®]** with water to provide 600 ppm of active ingredient.

Directions

Perform this procedure once daily.

Step 1

If the surfaces are heavily soiled, a precleaning should be completed prior to **CHEMPROCID[®]** application.

Step 2

Using a trigger sprayer, brush, foam, or dipping, apply **CHEMPROCID[®]** at a use dilution of **8 ml/L** of water, to all surfaces. Do not rinse the **CHEMPROCID[®]** and wipe surfaces with disposable towels.

This product is to be used in accordance with the instructions on the label.

**contains didecyl dimethyl ammonium chloride/isopropanol)*
